AI CLASS · PROJECT PROPOSAL · GROUP 7 · 5 LAZY LADS

AI Model *Lab*

Click it. Test it. See the result.

PRESENTER	STUDENT ID	PART	SLIDES
Aung Kyaw Phyo	6708142	The lab	Intro, 1–2
Bhone Pyae Hein	6708463	The making	3–4
Phone Sett Paing Kyaw	6708369	The models	5–6
Han Phyo Htet	6708463	What's next	7–8
Saw Stephen Win	6708566	Conclusion	9

OPEN THE PRESENTATION

Presentation: `model-lab-library.vercel.app/present`

Try the working models: `model-lab-library.vercel.app`

It opens in any modern browser, with nothing to install. The slides are part of our project's own website.

HOW TO MOVE THROUGH IT

On a computer

Press `Space` or click

Start

: a 21-second intro video plays (sound on). Then `Space` / ↓ / → for the next slide, ↑ / ← to go back, `F` for full screen.

On a phone

Tap

Start

or swipe up to begin.

Swipe up

for the next slide,

swipe down

to go back. On the last slide, scan the QR code to open the live models.

WHAT EACH SLIDE COVERS

#	SLIDE	PROPOSAL SECTION
1	AI Model Lab: topic and team	§1 Topic & team
2	What the lab does	§2 Scope / functions
3	How the models learn: supervised learning, transfer learning, a frozen test set	§3 Techniques
4	How they predict and how we measure: object detection, thresholds, mAP and F1, running on the device	§4 Techniques
5	Sea creature detector: real UI, 0.74 mAP@50 on 767 test photos	§5 Result / UI prototype
6	Sound detective: real UI, 0.79 mAP on 4,216 test clips	§6 Result / UI prototype
7	RAG assistants: built, still being tested	Extra
8	What's coming next	Extra

9	What we built, references, QR code to the live site	§7 Conclusion & references

Every number in the presentation is measured on test data the models never saw during training. Each model's page on the site also shows where it fails.
